

## TWO JUNIOR LEADER POSITIONS

The VIB Department of Plant Systems Biology (PSB) is a world-leading plant science institute with the mission to integrate genetics, genomics and bio-computing to unravel the biology of plants and to further explore the potential of plants to build a sustainable world.

The Department of Plant Systems Biology is located at the heart of a renowned Plant Biotech campus in Ghent, Belgium. Please visit us at [www.psb.ugent.be](http://www.psb.ugent.be) for more information.

We are seeking to recruit two outstanding **Junior Group leaders** with novel and exciting research programs that would integrate well with our present framework of research. Please visit <http://www.psb.ugent.be/groups> for more information regarding the different research groups active in PSB.

We offer an internationally competitive package including an initial five year appointment for the group leader, which can be prolonged after positive evaluation by a Departmental Evaluation Board. Support will also include funding of 2-3 group members depending on the experience level of the candidate, bench fees and access to state of the art infrastructure and services.

Applicants will have demonstrated excellence by outstanding publications in high impact factor journals, acquisition of external funding and an international profile. Experience in Technology transfer is an asset.

Please submit your application with CV, a three page research proposal and the names and contact details of three reference persons to Christine Tiré ([chtir@psb.ugent.be](mailto:chtir@psb.ugent.be)).

**Deadline for applications: August 15<sup>th</sup>, 2012.**

The Dept. of Plant Systems Biology belongs to the Flanders Institute for Biotechnology ([VIB](http://www.vib.be)) and the Ghent University ([UGent](http://www.ugent.be)), both equal opportunity employers.
